# Cloud Browse

- For seamless access to unauthenticated Browse images and supporting documents (User guides)
- Served from S3 buckets
- With functionalities encompassing image and document download, multi-select capability, printing options, and an interactive viewer equipped with search functionality
- Dashboard (website) is build with ReactJS and S3 List API (a structured directory format through a table view)
- Ongoing Open Source paperwork

# Cloud Browse

# A Look Back on Accomplishments

## • New Features

- APIs and Filter.
- Image and Doc Viewer.
- New header and footer.
- File Zipping and download.
- Text based search filter.
- Get multiple source link for Browse Image files.
- User experience enhancing tools like Print page, Zoom in/out, Search within the document, and file multi-select.

# Current and Future Activities

- **Continuation token usage**

- Currently, API limits 1K items, several datasets has more than 5K files
- Implement the token to paginate the API and get more files

- **Advanced Filters**

- Currently supports, text-matching filter, useful to have filters based on date and time

# Live Demo!
