

APR-2 Status for Aug 30 Post Flight

Submitted by **durden** on Tue, 08/31/2010 - 08:51

- **APR-2**
- **Earl**

Flight Date:

Monday, August 30, 2010

Sortie Number:

10-06-10

APR-2 worked well and collected data during the figure four patterns in Hurricane Earl. This should be a nice data set to compare with the previous day when Earl was only Cat-1. During this flight, we also completed a rudimentary capability to display APR-2 data in near real-time on the DC8 data system.

We are ready for the next flight.

Status:

Green
