

LASE measurements during frontal mapping over the Gulf

Submitted by **Syed Ismail** on Tue, 08/31/2010 - 13:55

- **LASE**

Flight Date:

Tuesday, August 24, 2010

Sortie Number:

007

LASE operated well during this flight. Most of the time the aircraft was in clouds associated with the front that was sampled. Dry air intrusions were seen in the NW segment towards the later part of the flight. Opportunities for comparison with dropsonde water vapor measurements.

Status:

Green
