

# Flt 10 LASE measurements over Hurricane Earl (2)

Submitted by **Syed Ismail** on Tue, 08/31/2010 - 14:25

- **Earl**
- **LASE**

Flight Date:

Saturday, August 28, 2010

Sortie Number:

010

LASE operated well during this flight. In the early part of the flight aerosol layer over 0-3 km altitude region was seen. Two dropsondes were launched to infer characteristics of the aerosol layer. Most of the flight was in clouds but the eye was profiled during 7 crossings with simultaneous aerosol, water vapor, and cloud observations sometimes all the way to the surface.

Status:

Green
