

LASE measurements during Fort lauderdale to St Croix

Submitted by **Syed Ismail** on Tue, 08/31/2010 - 14:05

- **LASE**

Flight Date:

Saturday, August 28, 2010

Sortie Number:

008

LASE operated well during this flight and measured water vapor, aerosol, and some high level cirrus during this flight. Some aerosol loading within and above the boundary layer was observed. There was not much aerosol loading above 2 km. Dry air intrusion was seen towards the end of the flight.

Status:

Green
