

# AMPR May 11

Submitted by dcecil on Wed, 05/11/2011 - 18:30

- [AMPR](#)

Flight Date:

Wednesday, May 11, 2011

Status:

Yellow

AMPR behaved similarly to in recent flights, except the navigation would not sync. That can be added later. The 37 H channel saturated early in the flight (within ~1 hour) and the 85 V channel quickly became noisy. The other channels performed well.
