## **Status**

Submitted by mattwingo on Tue, 05/10/2011 - 17:38

• APU

Flight Date: Tuesday, May 10, 2011 Status: Green

All 16 APUs are collecting data. Insulation to protect from hail damage has been installed on the solar panels. The APUs can run for 3-5 days on battery power when the battery is fully charged. Current voltage readings suggest the batteries will last 1-3 days.
