

NPOL Radar Scientist Report 2000 UTC 27 April 2011

Submitted by josephhardin on Wed, 04/27/2011 - 14:50

- [NPOL](#)

Flight Date:

Wednesday, April 27, 2011

Status:

Red

Shift Summary 1200 UTC 27 Apr to 2000 UTC 27 Apr

A steady rain fell over the entire area for a few hours early in this shift. The DSD Scan-4 strategy was employed to capture the rain over the CF. NPOL scanned the departing rain and then went to Scan-0 surveillance. Turned NPOL over to Mike at 1720 UTC for engineering testing of the sector scans...testing continued through the end of this shift.

End of Summary

David Marks
