

## May 12 POD Update 2

Submitted by larrycarey on Thu, 05/12/2011 - 09:55

Date:

Thu, 05/12/2011

Today:

ER-2 mission scrubbed. Only very patchy precipitation over CO in vicinity of CHILL.

Citation down. Lack of precipitation over the SGP-CF today.

Crew rest after good mission yesterday.

Friday:

ER-2 hard down.

Citation on loose standby based on conditions over the SGP-CF. Based on precipitation forecast, only slight chance over radars/instruments.

Extended Outlook (Saturday - Monday)

Offutt AFB runway closed from Saturday 0800 CDT to Tuesday 0800 CDT. Saturday/Sunday, PI's work on instruments.

Citation on loose standby. Ridge building in during period so precipitation chances over SGP-CF appear to be very low.

Tentatively planning a science discussion for Monday. More details coming.
