

**Table S3** – Top 500 flash rate density (FRD, fl km<sup>-2</sup> yr<sup>-1</sup>) grid points, indicating their latitude and longitude position, name of the nearest populated place location (PPL) according to Geonames.org, the corresponding continent landmass, and distance between the center of this grid and the PPL coordinates. A *minimum distance of 100 km from a previous ranked grid point was applied.*

Rank #	FRD (fl km <sup>-2</sup> yr <sup>-1</sup> )	Grid Latitude (°)	Grid Longitude (°)	Nearest Populated Place Location (PPL) from Geonames.org	Country	Continent	PPL Latitude (°)	PPL Longitude (°)	Distance (km)
1	232.52	9.75	-71.65	Lagunillas (actually over Lake Maracaibo)	Venezuela	South America	10.13	-71.26	60.1
